

## YOU WILL NEED:

1. Scissors.
2. Glue.
3. Two sheets of 8.5 x 11 inch card stock paper. It does not need to be really thick or heavy, as long as it is a bit sturdier than regular printer paper.

You may also use a bone folder or another creasing tool, but it is not necessary.

To prepare for the workshop, please cut along the perimeter of the card (marked in pink), leaving the interior untouched. Please also cut out ten purple butterflies.

Butterfly guide for placement.
